SKILLS

HTML	Skillful	Responsive web design	Skillful
Css	Experienced	Soft skills	Expert
JavaScript	Skillful	Python	Beginner
Bootstrap	Experienced	Machine Learning	Beginner

PROJECTS

Flip kart landing page

I created a landing page for Flipkart using HTML and CSS, designed to provide a visually appealing and user-friendly experience. The layout features a clean and modern design that highlights the latest products and offers available on the platform.

The homepage includes a prominent header with the Flipkart logo and a navigation bar for easy access to various categories such as electronics, fashion, and home essentials. Below the header, there's a visually striking hero section with a carousel showcasing featured deals and promotions, encouraging users to explore further.

I utilized CSS for styling, ensuring a responsive design that looks great on both desktop and mobile devices. The color scheme reflects Flipkart's branding, with a focus on blue and yellow accents. Additionally, I implemented hover effects on buttons and images to enhance interactivity, making the browsing experience engaging for users. Overall, this project demonstrates my ability to create functional and attractive web pages using fundamental web technologies.
